One of the greatest pleasures of entertaining is the delight of being able to serve others, to prepare favorite food and drink for treasured friends and family. This area offers everything needed to move the party outdoors and enjoy an exquisite Oklahoma spring afternoon or summer evening.

A state-of-the-art Alfresco gas grill allows the chef to grill guests' favorite meals. High-intensity halogen work lights offer the flexibility to continue cooking even after sunset. Perhaps the host wishes to serve

cuisine from a different region... a shrimp boil becomes instantly possible with the Alfresco Versa Power Cooker. Of course, libations are a vital component of any casual gathering, and the Alfresco refrigeration system serves either as a regular refrigerator, or a "keggerator," with favorite beers served at optimal temperature.

The outdoor kitchen island is custom-made to last a lifetime, built with welded square tubing for durability, granite tile countertops and outdoor rated mortar and stainless steel components, all by Alfresco. ■
